Proposed Database Title:

“Pet Adoption System”

Project Description:

The **Pet Adoption System** is designed to help people find and adopt pets from shelters easily. It connects people who are looking to adopt pets from rescue operations. This process is smoother and faster.

Definition of the System

We named this project ‘The Pet Adoption System’ with the goal of helping stray pets find loving homes. Our aim is to connect these animals with caring fur-parents who can provide them with comfort, love, and safety.

To our limitations, adopters must follow our policies and adoption process to ensure the pets are placed in good hands. We want to make sure they go to loving homes where they will be well cared for.

In our entities ‘The Pet Adoption System’, the pet entity holds key details like name, breed, age, health status, while admins can add, update, or remove pets from the list of available animals. The adoption entity manages the entire adoption process, tracking request and their status, and linking each adoption to a pet and an adopter, who registers in the system through the adopter (user) entity. The donation entity records and tracks donations made by adopters or other users who visited our website, while the appointment entity schedules meetings between adopters. Lastly, the admin entity oversees the whole system, ensuring proper management of pets, adoptions, donations, and appointments.

For developing of the Pet Adoption System, we carefully planned to ensure that all functional needs such as pet management, user registration, adoption process tracking, donation management, and appointment scheduling are all seen by admins only. We also prioritized ensuring that the security, information handling, and performance of the website are smooth, secure, and provide a user-friendly experience.

Website Manual

Log In/ Sign Up

The user will create first their account where the user has to input their desired username, email, password and confirm their password. The user will also have to read the terms and condition and click the checkbox after reading. Then, the user has now created their account and the user can now log in.

Homepage

The user will be welcomed in the homepage where the page has the steps on how to adopt a pet and how much the adoption could be. At the very bottom of the page, there is an information about us and how to contact us which has our address, contact number, email and our social media.

About us page

The user will be able to know information about us, what our mission and vision is, and the values we treasure.

Adopt page

The user will be able to see what pets can be adopted. When the user clicks on the photo of the pet, they'll be able to see what's the age of the pet, when have they been rescued, the gender, and the description of the pet.

Donation page

The user will be able to donate if they wanted to. They can donate through bank transfer or online transaction where they can scan GCASH QR code.

Account Page

The user will be able to access their account. And they can log out whenever.

Entity Descriptions:

1. Entity: Pet

Attributes:

- Pet_ID
- Name
- Age
- Type
- Breed
- Gender
- Health
- Vaccinated

- Year_Rescued
- Adoption_Status
- ImageURL
- Description

2. Entity: Adoption

Attributes:

- Adoption_ID
- Adoption_Date
- Pet_ID
- Status

3. Entity:User(Adopter)

Attributes:

- User_ID
- FirstName
- LastName
- Email
- PhoneNumber
- Work
- UserName
- Password

4. Entity:Donation

- Attributes:
- Donation_ID
- User_ID
- Donation_Amount
- Donation_Date

5. Entity: Admin

Attributes:

- Admin_ID
- FirstName
- LastName
- Email
- Phone
- Position
- Username
- Password

6. Entity: Appointment

Attributes:

Appointment_ID

User_ID

Pet_ID

Date

Time

ERD (Entity-Relationship Diagram)

Admin → User (one-to-many)

Admin → Adoption (one-to-many)

Admin → Pet (one-to-many)

Admin → Donation (one-to-many)

Admin → Appointment (one-to-many)

User → Donation (one-to-many)

Adoption → Pet (one-to-many)

User → Appointment (one-to-many)

Pet → Appointment (one-to-many)

User → Adoption (one-to-one)

Proposed Features:

- Easy-to-use and navigable homepage, about us, donation, adopt, and account page.
- Footer links that direct to Facebook and Instagram pages.
- Cute backgrounds and design.
- Alert or warnings when your username and password are incorrect. It also notify you on our page when you don't have an account.
- Efficient and easy donation process with just a scan of our QR code.
- Ability to manage your account information by editing your profile.
